Technical Skills

- React JS
- Redux
- Git
- JavaScript
- HTML
- CSS
- Tailwind CSS
- Bootstrap

Soft Skills

Team Work | Problem-Solving | Time Management | Leadership | Effective Communication

Education

MERN Stack Web Development

Skill Safari, Coimbatore
Sep 2022 - May 2023

BE - Metallurgical Engineering

PSG College Of Technology, Coimbatore
Aug 2018 - June 2022

Certificates

- [MERN Stack Web Development](#)
- [React.JS \(Basic\) - HackerRank](#)
- [Front-end Development Libraries \(React\) FreeCodeCamp](#)
- [Javascript DSA - FreeCodeCamp](#)
- [Responsive Web Design - FreeCodeCamp](#)

PRABAKARAN

React JS Developer

I am an enthusiastic, self-motivated, and responsible individual looking for a challenging role where I can continue to grow and make a positive impact. With a strong commitment to success, a passion for technology, and a demonstrated proficiency in front-end technologies, I am confident in my ability to thrive in a dynamic and fast-paced work environment.

Projects

1) E-COMMERCE WEBSITE

[GitHub](#) || [Live URL](#)

Technologies used : React JS | Tailwind CSS | Firebase

- In my front-end project, I incorporated various technologies and practices to enhance the user experience (UX) and ensure cross-browser compatibility. I utilized ES6 features for improved code readability and maintainability.
- For user authentication, I integrated Firebase Authentication, which restricted access to authenticated users only. To handle navigation and state management effectively, I employed React Routers, as well as the useState, useEffect, and useContext hooks.
- I used Tailwind CSS framework to work on the UI and create a responsive web design. I conducted thorough testing to ensure the application's compatibility across different browser.

2) BLOG WEBSITE

[GitHub](#) || [Live URL](#)

Technologies used : React JS | Bootstrap & SASS | Firebase

- Firebase for authentication, database, and storage, enabling secure user authentication and seamless storage of user details and blogs. I implemented React hooks such as useState, useEffect, and useContext.
- I stored all the Blogs in Firebase database, so users can continue to view and edit or delete their blog. Bootstrap & SASS to work on the user interface (UI) and create a responsive web design.
- I utilized the React-Carousel and Toastify npm packages to enhance the better user experience. I used React Router DOM package to facilitate seamless navigation and create a single-page application.

3) FOOD DELIVERY WEBSITE

[GitHub](#) || [Live URL](#)

Technologies used : React JS | Tailwind CSS | Firebase

- I utilized JSX (JavaScript XML) in conjunction with React hooks to effectively manage state and integrate dynamic elements into my components. I also integrated Firebase authentication, database, and storage into the in my web application.
- I used react-router-dom to handle navigation throughout the app. Additionally, I allowed the admin to add new food items and categorize them accordingly. I utilized Webpack and Babel for build process.
- Webpack helped me bundle and manage the dependencies, while Babel allowed me to transpile my code to ensure compatibility across different browsers and environments.
